

workplace partnership program

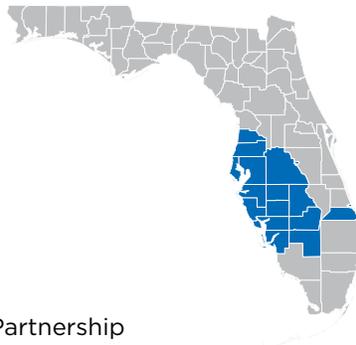

LifeLink of Florida, a nonprofit community service organization, recovers life-saving organs and tissue for transplant therapy in 15 counties on Florida's west coast.

In an effort to provide accurate information about the organ and tissue donation process and register a decision on Florida's state registry, DonateLifeFlorida.org, LifeLink partners with local businesses through its free Workplace Partnership Program (WPP).

LifeLink of Florida

15 counties:

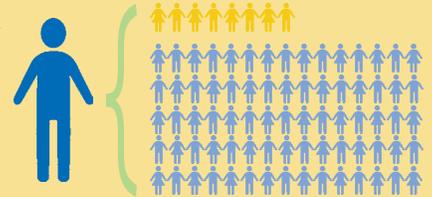

Charlotte, DeSoto, Glades, Hardee, Hendry, Hernando, Highlands, Hillsborough, Lee, Manatee, Martin, Pasco, Pinellas, Polk and Sarasota

The LifeLink WPP invites companies and organizations to educate their employees, clients and/or members about the need for organ, eye and tissue donation. The LifeLink WPP is affiliated with the National Workplace Partnership for Life effort put forth by the U.S. Department of Health and Human Services, and includes thousands of corporations, small businesses, community groups and organizations. Join us, and share the life-saving message of organ and tissue donation.

organ and tissue donation facts:

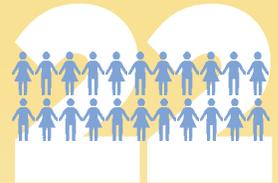

ONE DONOR can save **8** lives through organ donation and improve more than **75** through tissue donation.

There is no age limit for donation.

All major religions support donation as a personal decision and generous act of kindness.

Neither organ nor tissue donation will impact funeral arrangements.

EVERY 10 MINUTES another name is added to the national waiting list for a lifesaving organ transplant.

22 PEOPLE die each day because the organs they need are not donated in time.

Donation places no financial burden on the family or estate of the donor.

LifeLink®

LifeLink Workplace Partnership Program

LifeLink provides all materials free of charge.

Implementation ideas:

- Allow LifeLink to host an information table at your organization's existing **health/benefits fair**.
- Allow LifeLink to staff an **information table in a high traffic area** within your company for a short period of time on an agreed upon date.
- **Publish an article** highlighting a donor or recipient story with a call to action that can be included in a company newsletter or email blast.
- Invite LifeLink to **host a "lunch and learn"** for your staff.
- Let us design a digital image to place on monitors throughout your office or for you to use as a **screensaver**.
- Include donation **information in new hire packets** and/or place a link to the LifeLink website on your company's health benefits intranet page.
- **Host a Give Life Day**. In addition to LifeLink, Florida One Blood (blood donation) and Be the Match (bone marrow donation) can present information on several ways one can save lives. This miniature health fair would include a presentation from all three organizations, a lunch and learn and the opportunity to donate blood or register to be an organ, eye, tissue and bone marrow donor. (This opportunity would require at least two months advance preparation in order to secure a blood mobile.)

How will your company benefit from this partnership?

- Partners receive **accurate information** about organ, eye and tissue donation and have the opportunity to register to save lives.
- **Partnership activities** will be highlighted on LifeLink social media sites which will promote your organization and highlight your involvement with community health needs.
- LifeLink will highlight this partnership on the **Community Partner** page of our website, www.LifeLinkFoundation.org.
- Active partners may be submitted for national recognition by the U.S. Department of Health and Human Services as well as **local and state recognition opportunities**.

**If you have more than one office in Florida, let us know! We would love to connect with your colleagues in all of your branches.*

Many employers provide health and wellness information to their employees. The LifeLink Workplace Partnership Program will enhance any current efforts. We can provide factual information and address common misconceptions surrounding organ and tissue donation. We can also discuss organ health and information on funding resources for pre- and post-transplant recipients.

There is **NO fundraising component** associated with this partnership, however, we realize that some organizations and individuals are eager to support our life-saving mission and would gladly share information about the LifeLink Legacy Fund, a separate but affiliated non-profit organization that supports the mission of LifeLink Foundation.
